

KEY TECHNICAL LEVELS IN CORN AND SOYBEANS

By Blake Robben (July 18)

Both corn and soybeans are pricing in record yields, but how long will this last? Let's look at some proprietary numbers to help navigate these turbulent waters!

I prefer to construct my bull-bear line using a combination of moving averages, along with prior swing highs and lows. Once the numbers are calculated, I pay close attention to the bull-bear line. This will give me the momentum bias that I like to trade with. Also, I look at intra-day volume bars around these numbers to validate the strength of the signal. Please contact me if you need further guidance using these numbers. Thank You and Trade Well My Friends!
