

## Triangle Top or Continuation in the S&P 500?

By Blake Robben

The symmetrical triangle is a coiling pattern that needs continual assessments. Currently we have a mammoth pattern developing in the E-mini S&P 500. Furthermore, this pattern potential can be calculated by simply subtracting the high pattern price 2883 from the low price 2533 which is 350 S&P 500 points, or approximately \$3.2 trillion dollars in S&P 500 market capitalization value. Also, the pattern apex comes in at the summer equinox, so a resolution to this pattern is upon us.

Chart provided by QST

To learn more about this pattern this is the best link I have seen:

[http://stockcharts.com/school/doku.php?id=chart\\_school:chart\\_analysis:chart\\_patterns:symmetrical\\_triangle\\_continuation](http://stockcharts.com/school/doku.php?id=chart_school:chart_analysis:chart_patterns:symmetrical_triangle_continuation)

Please contact me if you have any questions at 312.242.7990 or via email at [blake.robber@archerfinancials.com](mailto:blake.robber@archerfinancials.com). GOOD DAY AND TRADE WELL MY FRIEND!
