

The Measured Move in Crude Oil

By Blake Robben (Sept 19)

In this article I will highlight the upcoming measured move in December Crude Oil.

What is the Measured Move Pattern?

The measured move pattern is a chart pattern that states that a market has the tendency to move in a similar price structure based on how it moved recently. It is not just the price distance that should be the same, but also the time needed to reproduce the same move should be approximately the same. The measured move technique can be found in all markets and in all time intervals.
